

# Test your agritech innovation in the field!

## About Test Farms

Have you created an innovative solution that can make a positive change and improve agricultural practices? Test Farms programme will help to validate your agritech technology or product in real conditions and increase your chances for commercial success!

## For whom?

- For startups with innovative prototype for agricultural challenges

**FIND OUT MORE  
AND APPLY HERE!**

## WHY SHOULD YOU JOIN OUR PROGRAMME?

### Validation

Test the functionality and need for your solution by cooperating with professional farmers operating on different types of land, growing various crops and rearing various animals.

### Visibility

Showcase your refined product to potential clients on Demo Day, organised at the site of the farmer.

### Network

Get access to the EIT Food network: agricultural companies, research institutes and startups.

### Funding

Receive a 3000 EUR budget to support the travel and testing phase.

Check [Terms and Conditions](#) for funding eligibility

## PROGRAMME OVERVIEW

03 - 04.2021

### APPLICATION

Explain how your solution is innovative and why you want to test it.

06.2021

### MATCHMAKING

Meet and get matched with the right farmer with suitable testing conditions.

07.2021 - 07.2022

### TESTING

Test your solution in the field, then validate and improve it.

07.2021 - 07.2022

### DEMO DAY

Showcase your refined product to potential clients.
