Keynote speaker

Adriana Domínguez

Executive President of **ADOLFODOMINGUEZ**

Adriana Domínguez has a degree in International Business Sciences and a master's degree in Thought. Adriana is the Executive President of the Adolfo Domínguez group, whose origins lie in a small family tailor business in Ourense, in inland Galicia (Spain). Currently, the fashion brand has over 390 stores distributed all around the world.

The circular economy is a model of production and consumption, which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products as long as possible. In this way, the life cycle of products is extended.

Sustainable fashion maximizes the benefits to the fashion industry and society, while at the same time minimizing its impact on the environment. This requires a more holistic perspective that considers not only how fashion is produced, but also how it is consumed.

Sustainable fashion design
